www.ReaDI-Watch.com

ReaDI-Watch seeks to transform the way companies manage R&D.

Track, record and manage your R&D projects in **real-time** and on the **cloud**.

Get the **best return** on R&D investment and **maximise R&D tax credits and grants**.

It is a simple and effective tool for companies who are investing in their future.

We are Hiring an Associate Product Developer

We are looking for an ambitious and entrepreneurial candidate to join our small and fast-moving team to enable us achieve our goal of scaling the ReaDI-Watch Platform as an international SaaS Offering.

In this role, you will be working directly with the CEO, Head of Product Development and other team members to grow and scale our platform. We work in an Agile "SCRUM" format, and all team members bring their best to the table. We take the ball, and run with it, bring our teammates along with us.

We take a flexible approach to working, and want you to be as satisfied as possible so you can bring us your best. We operate a hybrid working model, based from our office in Dublin. We also have flexible daily hours and will accommodate you, if you will also accommodate us, to achieve our shared goals.

Key Attributes, Skills & Activities

- 2-5 years professional experience in Software Development Role
- Competency in Web-App Development & APIs
- Willingness to embrace new technologies, and no-code / low-code development philosophy
- Self-starter and Entrepreneurial mindset - ambitious to grow into a Team Lead role
- Innovative- must be willing to embrace change and to maintain commitment to our overall business goals
- Professional - strive for solutions and the highest quality achievable
- Communicative - minimise confusion and complexity and get the best from everyone around you

ReaDI-Watch© Team

ReaDI-Watch builds on the years of client experience, platform development and international thought leadership in R&D Management in GB Innovation Ltd., founded by Professor Gerry Byrne in 2014. Dave Byrne founded ReaDI-Watch Ltd. in 2021 as a high-growth start-up to globally deploy the structured & systematic software toolkit, following the ReaDI-Watch Platform's success in GB Innovation. Driving the development and customer adoption of ReaDI-Watch since 2018, David has now positioned the company to grow internationally. ReaDI-Watch Ltd. seeks to transform the way companies around the globe manage R&D. By managing R&D in real-time and on the cloud, companies can get the best return on R&D investment and maximise on R&D tax incentives and grants.

To achieve its ambitious goals, ReaDI-Watch is building a best-in-class team.
We want you to come with us on our journey!
